COMPANY WHO WE ARE

MELFORM, leader in the field of systems for the controlled temperature transport, is an Italian company, specialized in the study, engineering and production of insulated and refrigerated containers for logistics.

MELFORM boasts a highly qualified R&D Department able to study custom solutions for specific needs of handling, storage and delivery.

MELFORM has always been synonymous of safety and quality: our containers, known worldwide, comply with current regulations: they are NF certified, safe to work in a HACCP environment and ATP certificate for the transport of perishable products.

Thanks to the experience and the advanced technology of Bonetto Group, the engineering area has been improved, consolidating its know-how in rotational and compression molding.

MELFORM - Bonetto Group represents a reliable partner where temperature is the essential requirement for the QUALITY of the products.

EXPERIENCE - On the market for over fifty years, Melform is leader in the cold chain solutions and temperature control systems. MELFORM - Bonetto Group represents a reliable partner where temperature is the essential requirement for the QUALITY of the products.

TECHNOLOGY - Produced with the rotational moulding technology, our containers are made of polyethylene suitable to food contact and insulated with polyurethane foam without CFC and HCFC. With a special attention to details, our products are individually tested and carefully checked by the quality department before being placed on the market.

KNOW-HOW - MELFORM adopts Business Management Systems which cater to the requirements of international standards.

- Business Management Systems
- UNI EN ISO 9001:2015 – Quality Management Systems
- NF par AFNOR certification
- ATP certification for transport of perishable goods.

WHY MELFORM

CUSTOM MADE

The production flexibility and know-how of our technical staff allows us to create and customize products based on customer needs.

HACCP COMPLIANT

Melform isothermal containers, made with rotational molding technology and compliant with HACCP regulations, allow the products to be kept at the correct temperature, limiting the risk of uncontrolled growth of bacteria.

ATP CERTIFICATION

Sturdy and resistant, they are suitable for the transport of perishable products by road as they are ATP certified for the transport of fresh or frozen products. They guarantee cold chain from the logistics base to the end user for a service in total safety.

ECO FRIENDLY

The circular economy of our containers: A concrete gesture for our planet.

CIRCULAR: structure in recyclable plastic material

ECONOMIC: reusable for different operative cycles

SUSTAINABLE/RESPONSIBLE: at the end of the operative life, it can be disposed of, giving life to new product

OVERVIEW WHO TRUST US

 CATERING AND BANQUETING	 HO.RE.CA.	 FOODSERVICE
 FOOD SUPPLY CHAIN	 VENDING	 PHARMA LOGISTICS
 HANDLING, STORAGE AND DRY ICE TRANSPORT	 SUPERMARKET	 MEALS ON WHEELS SERVICE

Food and beverages delivery containers
at controlled temperature

THERMAX LINE

Melform insulated containers allow you to organize the transport of hot, cold and frozen products, maintaining the correct temperature, limit the risks of uncontrolled bacterial proliferation and protect the organoleptic properties of food.

Time savings and maintenance of food quality represent the real added value for professional catering companies. Our containers are produced with the rotational molding technology: the body and the door have a monolithic structure (without edges, joints and welds); they are made in polyethylene suitable for food contact and insulated with CFC and HCFC-free polyurethane foam.

- **Temperature under control**
- **Technology and isothermal quality**
- **Food quality**
- **Added value for foodservice**
- **Stackable**
- **Dishwasher safe**

Container for liquids EY 13

The EY13 container is specially designed for transporting and serving sauces and soups. The isothermal characteristics meet the criteria of the legislation in force (Reg. CE 852/2004 –HACCP-) and of the applicable technical standards (EN 1257 and Accord AFNOR AC D40-007).

Lightweight and easily stackable, it is equipped with four support feet which give the container considerable stability during transport. It ensures correct thermal maintenance, limiting the risk of bacterial proliferation and preserving the quality of the foods and their organoleptic properties. Designed to last: its performance remains virtually unaffected by reuse.

The inner container in polyethylene or stainless steel is available as an accessory. Fully recyclable at end of life. Produced with rotational molding technology: one-piece container and lid (without sharp edges, joints and welds).

Equipped with adjustable vent valve and stainless steel closures.

Isothermal container SINGLE

Isothermal container for meals delivery.

Ideal for use with 18x18 disposable or GN 1/6 pans.

It allows to carry a full meal of three courses

with differentiated temperature

(hot and fresh), thanks to the use of eutectic plates

and the isothermal separator.

For transporting complementary items

(cutlery, beverages, bread, fruit etc.),

an additional non-insulated section to be fastened to the back

of the container is available, on request.

The container is lightweight, easy to use

and it has a practical handle grip.

Easily removable door to facilitate washing operations.

Insulated with CFC and HCFC-free polyurethane foam.

Guaranteed for use from -30° to +100°C.

Isothermal container MALINETTE

Suitable for home catering or for transport and the distribution of special diets in school catering and hospital, the Malinette is equipped with 4 perfectly insulated compartments to transport a complete meal of three or four courses at different temperatures. Food can be placed in the high-performance oven/flame lunch pan, available as an accessory.

Lightweight container, simple to use and with an extremely comfortable handle for lifting and transport, the container guarantees excellent stackability and stability of the dishes even during transport.

Ensuring the correct thermal maintenance, thanks to its special conformation, limits the risk of bacterial proliferation, preserving the quality of the foods and their organoleptic properties. Equipped with integrated grip handle. Insulated with CFC and HCFC free polyurethane foam. Guaranteed for use from -30° to +100°C.

Fully recyclable at end of life.

FOCUS: MODULAR SYSTEMS

The innovative MELFORM modular system allows you to assemble two stacked containers in total safety. The presence of two separate and perfectly thermally insulated cells guarantees the simultaneous transport of hot, fresh and frozen products. The flexibility of this solution allows the transport of various types of products at a controlled temperature according to the user's needs, doubling the load capacity on the vehicle up to 300 litres. Available for AF12, AF150 containers.

The real added value in the work of professionals of catering.

Different compositions possible according to needs of transport.

- Technology and isothermal
- Maximum flexibility
- Multitemperature
- Food quality

Multiple possible compositions

Up to 300 liter capacity for transport in fresh bond

Transport in hot / fresh bond in total safety

Up to 300 liter capacity for transport in hot bond

Transport in hot / frozen bond without contamination and ensured isothermy

Maxidolly **600x400**

Recommended for handling AF and GN models.

Lightweight and easy to maneuver, thanks to the practical handle.

It allows to easily move three stacked containers. Structure in polyethylene.

Large capacity: can carry up to 150Kg.

Ideal for 600x400 boxes.

CAPACITY (L)	COLOUR	WEIGHT (KG)	DIM. (MM)	CODE
-	grey/blue melange chrome handle	9,4	EXT. 525x750x965H INT. 600X400	MAXI0012
-	grey/blue melange stainless steel handle	9,4	EXT. 525x750x965H INT. 600X400	MAXI0011
-	grey/blue melange without handle	7	EXT. 525x750x965H INT. 600X400	MAXI9002

Smartdolly

Recommended for Thermax AF7 and AF8 containers.

Large capacity: **it can carry up to 150Kg.**

Polyethylene body.

Stable, high performance, suited to your needs.

CAPACITY (L)	COLOUR	WEIGHT (KG)	DIM. (MM)	CODE
-	grey/blue melange chrome handle	9,5	EXT. 525x750x965H	MAXI0019
-	grey/blue melange stainless steel handle	9,5	EXT. 525x750x965H	MAXI0018
-	grey/blue melange without handle	7,1	EXT. 525x750x210H	MAXI9007

Melform eutectic plates

Melform thermal accumulators, thanks to their excellent eutectic properties, maintain the food at optimal storage temperature. They act as thermal energy accumulators, which is released during delivery, extending the temperature retention time. Particularly suitable in the case of partial loadings. They correctly operate in HACCP environment. Non-toxic liquid: high safety even in case of accidental contact with food.

Easy to use:

- Dip hot plate in water at the temperature of 80°C for 50 minutes;
- the chilled plate is to be frozen at least -10°C;
- the extra chilled plate is to be frozen at least -20°C;
- the frozen/extra - frozen plates are to be frozen at least -30°C.

GN 1/3 EUTECTIC PLATES FOR AF6

MODEL	TEMP.	COLOUR	CODE	DIM. AXBXH	WEIGHT	THERMAL ENERGY	MOQ	
GN 1/3 chilled plate	+3°C	white with green cap	AGA003	176x325 mm	1,3 kg	105 Wh	15	
GN 1/3 frozen plate	-21°C	white with yellow cap	AGB003	176x325 mm	1,6 kg	95 Wh	15	

GN 1/1 EUTECTIC PLATES FOR AF MODELS (AF6 EXCLUDED), AF150, AL, GN

Insulated trays **EN**

They allow you to transport four courses at different temperatures (hot and fresh), thanks to the reduced heat exchange between the seats of the tray. Equipped with four seats for housing melamine plates or disposable trays and a seat dedicated to housing complements to meals (cutlery, drinks, bread, fruit, etc.).

External dimension Euronorm.

The isothermal trays are insulated with CFC and HCFC free polyurethane foam. Guaranteed for use from -30°C to +85°C.

Accessories

MELFORM isothermal trays are equipped with melamine crockery. Specially designed to be used as an accessory and fit perfectly into the tray seats, the melamine crockery set has a bright and shiny appearance, similar to ceramics thanks to a specific treatment that makes the product unique and of the highest quality.

Light and easy to handle, Melform melamines are unbreakable and used mainly in schools, hospitals, rest homes, where user safety is the priority.

Easily sanitized and washable even in the dishwasher, they comply with the 852/2004/CE (HACCP) regulation on food safety.

Operating temperatures: from -18°C to +80°C.
 Maximum washing and drying temperature: +80°C.
 Resistant to detergents with PH lower than or equal to 10.

Further information on the product can be found on the relevant technical data sheet.
